DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 50-64, and 66-68 drawn to receiving information having a cell specific parameter and a radio link specific parameter, classified in class 370, subclass 329.
 - II. Claim 65, drawn to transceiver configured to receive and transmit signals over an interface between the apparatus, classified in class 455, subclass 550.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as transceiver configured to receive and transmit signals over an interface between the apparatus corresponding to at least one restriction for outgoing communication. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
